

# A partner with practical Blockchain Experience

Orange has significant experience in conceptualizing, developing and building blockchain based platforms.

We have developed permissioned and hybrid blockchain platforms for our own internal business as well as for and in partnership with customers across numerous industries including for Finance and Public Services. Here are just a few examples:

## Finance

The logo for NOWCP, featuring the text "NOWCP" in white on a blue square background.

### New generation trading platform

Enabling short term debts trading on Negotiable European Commercial Papers (NEUCP) market - more than 270€b of trades to date.

The Orange logo, consisting of the word "orange" in white lowercase letters on an orange square background.

### Trading platform

Creation of a trading platform with a pricing system and transaction incentivization based on Quorum.

## Industry, Government & Public Service

### Le vote

The citizen engagement app utilizing blockchain for citizen polling.

### Digital document certification

Document certification and tracking for the Egyptian justice department.

### AgDataHub

Managing farmer consent for agricultural data sharing through blockchain.

### Safe.press

Press release certification utilizing Blockchain to prevent 'fake news'.

### Smart contract editor

Facilitating the creation and integration of smart contracts in business processes and workflows.

### Circular economy

Leverage the Thing'in platform to manage connected objects, The Blockchain technology enables us to follow the life of an object from manufacturing, through transport to recycling/ decommissioning.
