

Protection against ransomware

—

Dutch holding company suppliers of timber and building materials

Industry

Manufacturing

Timber and Building Supplies (TABS) Holland, a holding company of suppliers of timber and building materials in the Dutch market, have always paid special attention to the security of their network. With the rise of ransomware, the company decided it was time to go one step further. For this, the wood specialists turned to Cegeka, who were already managing their workplaces and infrastructure.

A holding company

+ 1800 employees

+14 woodworking companies

Challenges

- Increasing number of **ransomware** cases
- Ensuring business **continuity**
- Having a dedicated in-house **security team** is not possible

Solution

- Complete **outsourcing** of security
- Implementation a **SIEM** (Security Information & Event Management) and a **SOC** (Security Operations Centre)
- Implementation of **EDR** and **NDR**

Benefits

- More **insight** into strange behavior on the network
- Fast and **efficient response** to security breaches
