Infrastructure

Agriculture

Case:

Monitoring of **environmental conditions** in sealed coldrooms.

Measurement of **air temperature, humidity, soil temperature and CO$_2$** during long term potato experiments.

Hardware setup:
➜ 7x Crodeon Reporter Std
➜ 21x low-power sensors

Case: muurtuin

Online monitoring of **isolation performance** on green walls.

Outdoor measurement of **air quality (PM) and CO_2** to investigate environmental impact.

API integration with Muurtuin app.

Hardware setup:
➜ 3x Crodeon Reporter Max
➜ 15x low-power sensors
➜ 3x solar panel

Case: **BRIDGESTONE**

Real-time measurement of temperature in cooling towers.

Monitoring of **weather conditions (rain and wind)** for production planning.

API-integration with enterprise BI solution.

Hardware setup:
➔ 2x Crodeon Reporter Max
➔ 12x low-power sensors
➔ 1x solar panel
