live longer

Needs

- Manage construction projects and their documents in an effective and collaborative manner
- Comply with the planning and budgets of multiple construction projects
- Provide complete as-built documents in digital format at the end of each project
- Be able to respond at all times to requests for internal and external audits

Solutions

- Assistance in the selection of a document management system
- Customisation of the selected system to the needs of GSK
- Implementation of a pilot document management project
- Deployment of LiveLink on all new construction projects Worldwide
- Provision and supervision of a team of document controllers
- Setting up of a Shared content service
- Global support in terms of resources, methods and procedures

Benefits

Outsourcing and centralization of the entire technical document management

Greater effectiveness, collaboration and trust

Improved responsiveness to audit requests

Provision of as-built documents in due time
