

HAI - ANONYMOUS CROWD MONITORING

This application was developed during the COVID-19 pandemic for The Beacon.

It performs real time monitoring the amount of people in a communal space in a building to inform people of the room occupancy by means of algorithms implemented on a platform..

Functionalities :

- 1,5-meter distance detection
- People count
- Mask detection
- Community application
- Privacy preserving through EDGE A.I.

HAI - ANONYMOUS CROWD MONITORING
